Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

INDEX TO VOLUME VI

(New names and final members of new combinations are in **heavy face** type.)

Albino plants, influence of sugars on the growth of, 401

Alpha-crotonic acid, action of, on plants, 167

Ambrosia trifida, certain pathologic conditions in, 34

ANDRONESCU, DEMETRIUS ION. Germination and further development of the embryo of *Zea Mays* separated from the endosperm, 443

Aspergillus niger, chemical stimulation of, 330, 357

Atkinson, George Francis, life of, 301; portrait of, Plate XXXV; publications of, 303

BAILEY, L. H. (See Farlow, W. G., p. 301)

BEACH, WALTER SPURGEON. Biologic specialization in the genus Septoria, 1

BROWN, MABEL MARY. The development of the gametophyte and the distribution of sexual characters in *Funaria hygrometrica* (L.) Schreb., 387

BUCHHOLZ, JOHN T. Studies concerning the evolutionary status of polycotyledony, 106

Cacti, mucilage in, 156

Cedrus Libani, colyledons in, 113

Carnegiea, mucilage in, 157

Chayote edulis, 380, 383

Chemical stimulation of the growth of *Aspergillus niger*, 330, 357

Citrus grandis, venation and senescence of polyembryonic plants of, 311

Citrus plants, polyembryony in, 311

Colocasia esculenta, 380

Colorado, rôle of sedges in plant communities of, 120

Corn, growth of albino plants of, 401; plastids and mitochondria in, 217

Cranberry, endrot fungus on, 235

Cyrtandra biserrata, 53; *confertiflora*, 210; **Conradtii,** 53; *Garnotiana*, 205; **Giffardii,** 205; *glauca*, 213; *gracilis*, 65, pl. VII, var. *subumbellata*, 66; *Grayana*, 55, var. **lanaiensis,** 57, var. *latifolia*, 56, var. **linearifolia,** 56, var. **nervosa,** 57; **halawensis,** 60, pl. IV; **Hashimotoi,** 215; *hawaiiensis*, 211; *kalichii*, 63, var. **tristis,** 64; *Kauaiensis*, 54; **kohalae,** 59, pl. III; *laxiflora*, 206, pl. XXIX, var. **grandifolia,** 207, var. **rhizantha,** 207; *Lessoniana*, 48; **limosiflora,** 209, pl. XXX; *longifolia*, 211, γ *parallela*, 211; *Lydgatei*, 68; *lysiosepala*, 50, var. *Fauriei*, 50, var. *Grayi*, 52, var. **haleakalensis,** 52, var. *latifolia*, 51, var. *pilosa*, 51; *Macraei*, 67, pl. VIII, var. *parvula*, 67; *macrantha*, 212; *Menziesii*, 62, pl. VI; **montis Loa,** 213, pl. XXXII; *oenobarba*, 213; **Oliveri,** 58; *paludosa brevicalyx* f. **linearis,** 210; *Pickeringii*, 58, pl. XXXI; *polyantha*, 208, var. **ambigua,** 209; *procera*, 54; **ramosissima,** 214; *scabrella*, 213; *triflora*, 204; **umbraculiflora,** 61, pl. V; *waiolani*, 65

Cyrtandreae Hawaiienses, Sections Schizocalyces Hillebr. and Chaetocalyces Hillebr., 47; Sect. Microcalyces Hillebr., 203

Dasheen and chayote, 380

Development of the embryo of *Zea Mays* separated from the endosperm, 443

Development of the gametophyte and the distribution of sexual characters in *Funaria hygrometrica* (L.) Schreb., 387

Ecologic foliar anatomy of some plants of a prairie province in central Iowa, 69

Ecologic subterranean anatomy of some plants of a prairie province in central Iowa, 87

Effect of the endrot fungus on cranberries, 235

Embryo of *Zea Mays*, development of, when separated from the endosperm, 443

Endosperm of *Zea Mays*, separated from the embryo, 443

Endothia pigments. II. Endothine red, 242

Endothine red, 242

Endrot fungus, effect of, on cranberries, 235
ENSIGN, M. R. Venation and senescence of polyembryonic citrus plants, 311
Evolutionary status of polycotyledony, 106

FARLOW, W. G., THAXTER, R., AND BAILEY, L. H. George Francis Atkinson, 301
FITZPATRICK, HARRY, M. Publications of George Francis Atkinson, 303
Funaria hygrometrica, gametophyte and sexual characters in, 387
Fusicoccum putrefaciens, endrot fungus on cranberries, 235

Galls on *Ambrosia trifida*, 34
Gametophyte of Funaria, 387
Germination and further development of the embryo of *Zea Mays* separated from the endosperm, 443
GRAY, JOHN, AND PEIRCE, G. J. The influence of light upon the action of stomata and its relation to the transpiration of certain grains, 131
Growth and variability in Helianthus, 252

Hardiness in peach buds, 373
HARPER, R. A. The structure of protoplasm, 273
HAYDEN, ADA. The ecologic foliar anatomy of some plants of a prairie province in central Iowa, 69; The ecologic subterranean anatomy of some plants of a prairie province in central Iowa, 87
Helianthus, growth and variability in, 252

Influence of light upon the action of stomata and its relation to the transpiration of certain grains, 131
Influence of phosphates on the action of alpha-crotonic acid on plants, 107
Influence of sugars on the growth of albino plants, 401
Inheritance of sex in *Mercurialis annua*, 410
Iowa, ecologic study of prairie plants of, 69, 87

OHNSTON, EARL S. An index of hardiness in peach buds, 373

KNUDSON, L. Viability of detached root-cap cells, 309; and LINDSTROM, E. W. Influence of sugars on the growth of albino lants, 401

Larix, cotyledons in, 114
Light, action of, on stomata, 131
LINDSTROM, E. W. (See Knudson, L., 401)
LLOYD, FRANCIS E. The origin and nature of the mucilage in the cacti and in certain other plants, 156
LUTMAN, B. F. Osmotic pressures in the potato plant at various stages of growth, 181

Mercurialis annua, inheritance of sex in, 410
Mitochondria in Preissia and corn, 217
MORSE, FRED W. (See Stevens, Neil E., 235)
Mucilage, in cacti and other plants, 156

Nucleo-cytoplasmic ratio, in *Citrus grandis*, 373

Opuntia, mucilage in, 156
Origin and nature of the mucilage in the cacti and in certain other plants, 156
Osmotic pressures in the potato plant at various stages of growth, 181
Oxycoccus macrocarpus, endrot fungus on, 235

Papaipema galls on Ambrosia, 34
Pathologic conditions in *Ambrosia trifida*, 34
Peach buds, index of hardiness in, 373
PEIRCE, GEORGE J. (See Gray, John, 131)
Phosphates, influence of, on the action of alpha-crotonic acid on plants, 167
Picea Mariana, cotyledons in, 110, 114
Pigments of Endothia, 242
Pinus Banksiana, cotyledonary fusion in, 108; *Laricio*, cotyledons in, 114
Plastids and mitochondria in Preissia and corn, 217
Pleurage curvicolla, variations in, 406
Polycotyledony, evolutionary status of, 106,
Polyembryonic Citrus plants, 311
Potato, osmotic pressures in, 181
Prairie, ecologic study of plants of Iowa, 69, 87
Preissia, plastids and mitochondria in, 217
Protomyces andinus gall on *Ambrosia trifida*, 34
Protoplasm, structure of, 273

RAMALEY, FRANCIS. The rôle of sedges in some Colorado plant communities, 120
REED, H. S. Growth and variability in Helianthus, 252

REID, F. R. (See Skinner, J. J., 167)
ROCK, Joseph F. Cyrtandreae Hawiienses, Sections Schizocalyces Hillebr. and Chaetocalyces Hillebr.; 47, Sect. Microcalyces Hillebr., 203
Rôle of sedges in some Colorado plant communities, 120
Root-cap cells, viability of, 309

SANDO, CHAS. E. Endothia pigments. II. Endothine red, 242
Sedges, rôle of, in Colorado plant communities, 120
Septoria atro-purpurea, 26; *brunellae*, 21; *cirsii*, 20; *convolvuli*, 16; *helianthi*, 23; *lactucae*, 10; *lactucicola*, 9; *lepidiicola*, 22; *lycopersici*, 22; *malvicoli*, 15; *polygonorum*, 6; *rubi*, 26; *scrophulariae*, 16; **septulata**, 16, 19; *tritici*, 12; *verbascicola*, 19
Septoria, biologic specialization in, 7
Sex, inheritance of, in Mercurialis, 410
Sexual characters, distribution of, in Funaria, 387
SKINNER, J. J., AND REID, F. R. The influence of phosphates on the action of alpha-crotonic acid on plants, 167
STEINBERG, ROBERT AARON. A study of some factors in the chemical stimulation of the growth of *Aspergillus niger*, 330, 357
STEVENS, NEIL E., AND MORSE, Fred W. The effect of the endrot fungus on cranberries, 235
STEWART, ALBAN. A consideration of certain pathologic conditions in *Ambrosia trifida*, 34
Stimulation of the growth of *Aspergillus niger*, 330, 357
Stomata, influence of light on, 131
Structure of protoplasm, 273
Sugars, influence of, on the growth of albino plants, 401

THAXTER, R. (See W. G. Farlow, p. 301)
Transpiration, relation of, to action of light on stomata, 131
TWISS, W. C. A study of plastids and mitochondria in Preissia and corn, 217

Variations in *Pleurage curvicolla*, 406
Venation and senescence of polyembryonic Citrus plants, 311
Viability of detached root-cap cells, 309

WEIMER, J. L. Variations in *Pleurage curvicolla* (Wint.) Kuntze, 406

YAMPOLSKY, CECIL. Inheritance of sex in *Mercurialis annua*, 410
YOUNGKEN, HEBER W. Notes on the dasheen and chayote, 380

Zea Mays, plastids and mitochondria in, 217; germination and further development of embryo of, when separated from the endosperm, 443
Zinc, stimulation of the growth of Aspergillus by. 330, 357
